

COMPLY

DATA COMPLIANCE & LEGISLATIVE ASSESSMENT

UNDERSTAND LOCAL &
INTERNATIONAL PRIVACY
STANDARDS, LEGISLATION AND
COMPLIANCE REQUIREMENTS

OVERVIEW

What are the local and international privacy and compliance requirements, industry regulations and retention requirements that apply to your organisation and how do you currently stack up? Are there industry-specific requirements that apply to you that you may not be aware of? What are your obligations to both your clients and in meeting legislative and/or compliance needs?

APPROACH

We maintain an inventory of local, international and industry specific data regulations, against which we continually assess client datasets. Changes trigger immediate notification, enabling you to determine any impacts on client business processes, systems and personally identifiable data and take immediate action.

SERVICES

Our services range from basic legislative and regulatory information on a periodic basis, through to fully-automated real-time analysis of your data repositories and notification of changes applicable to your datasets.

AUTOMATION

Our **COMPLY** services can be automated to speed up notifications, remove human error and reduce and contain your exposure. Contact us for more information.
